

Curriculum Vitae of Romeil Sandhu

Personal Data:

Name: Romeil Singh Sandhu Phone: 631.632.2591
Citizenship: United States Email: romeil.sandhu@stonybrook.edu
DOB: March 20, 1985 Web: www.romeilsandhu.com

Short Bio & Overview:

Romeil Sandhu is currently an Assistant Professor at Stony Brook University with appointments in Computer Science, Biomedical Informatics, and Applied Mathematics & Statistics Departments and is the recipient of the **2018 AFOSR YIP Award** for work on interactive feedback control for autonomous systems and **2018 NSF CAREER Award** for work on geometric optimization of time-varying networks. Romeil first received his B.S. and M.S. degrees from the Georgia Institute of Technology in Electrical Engineering in 2006 and 2009, respectively. Then, under the direction of Professor Allen Tannenbaum, he completed his Ph.D. in 2011 in computer vision and machine learning. Prior to his academic position at Stony Brook, he formed a startup providing government services leading to a successful exit. His current research interest focuses on formally developing theory to bridge the information gap to combat risk complexities associated with the “unknown unknown” (e.g., human interaction) with a particular interest in the fusion of autonomous systems towards “non-expert” operators who possesses expert knowledge. This is often referred to as interactive autonomy.

Education:

1. **Ph.D. in Electrical Engineering**, Georgia Institute of Technology, January 2011.
Thesis: Statistical Methods for 2D Image Segmentation and 3D Pose Estimation
2. **M.S. in Electrical Engineering**, Georgia Institute of Technology, May 2009.
3. **B.S. in Electrical Engineering**, Georgia Institute of Technology, May 2006.

Previous Appointments:

1. **Stony Brook University** 2017 – Present
Adjunct Assistant Professor, Computer Science & Applied Mathematics Dept.
2. **Stony Brook University** 2016 – Present
Assistant Professor, Biomedical Informatics Dept.*
*Appointment in College of Engineering and Applied Sciences (CEAS)
3. **DoD Consultant** 2007 – Present
Industrial Consultant
4. **Stony Brook University** 2014 – 2016
Post-Doctoral Fellow, Computer Science and Applied Math Dept.
5. **Harper Laboratories, LLC** 2011 – 2014
President & Co-Founder
6. **Minerva Research Group** 2007 – 2011
Graduate Research Assistant, ECE Dept.
7. **Georgia Institute of Technology** 2006 – 2007
Graduate Teaching Assistant, ECE Dept.

Current (Funded) Research and Future Area Summary:

1. Interactive 2D3D Control for Autonomous Systems

This research focuses on the interplay of geometry and control to advance feedback control-based methods applied towards autonomy in an interactive manner. Examples of such work in this area includes the usage of developing control-theoretic principles to allow for human-user computer interaction to perform manifold sculpting and situational awareness / reconstruction in real-time / post-data collection. Applications of this research span several areas with a primary focus on autonomous systems in vision. The underlying mathematical interests lies in PDEs, feedback control, information geometry, and differential geometry to enable effective HCI performance.

Project Funding: 2018 Air Force Office of Scientific Research (AFOSR) Young Investigator Program (YIP) – 450K/3-Year

2. Geometric Optimization and Control of Time-Varying Networks

This research focuses on optimizing geometric & topological network properties to control dynamical systems often represented as weighted graphs that evolve over time. Research was the first to show that Ricci curvature is positively correlated with system's ability to dynamically adapt. Areas of research include mass transport, information/Riemannian geometry, as well as designing geometric flows capable of elucidating system-level fragility. Applications of this research are wide, and this program has been designed to be applied to a myriad of problems (e.g., congestion management, cyber-physical systems).

Project Funding: 2018 National Science Foundation CAREER Award – 500K/5-Year

Professional Activities:

1. Service:

National Science Foundation Panel Reviewer
Academic Senator (College of Engineering), Stony Brook University
Faculty Search Committee (BMI Dept.), Stony Brook University
Graduate Admissions Committee (BMI Dept.), Stony Brook University
Journal Reviewer, IEEE Transactions on Pattern Analysis and Machine Intelligence
Journal Reviewer, IEEE Transactions on Image Processing
Journal Reviewer, IEEE Journal on Biomedical Informatics
Journal Reviewer, SIAM Journal on Scientific Computing
Conference Reviewer: IEEE CDC, ACC, CVPR, ECCV, ICCV

Note I: Developing a newly defined educational outreach program for highschool dependents of U.S. Veterans for FY 2018 (via recent NSF CAREER award) in conjunction with Stony Brook University I-STEM.

2. Industrial Consulting:

Sigmatech Incorporated (2016-Present)
Harper Laboratories, LLC (2014-2017)
Scientific Systems Company, Inc. (2014-2015)
Trex Enterprises (2010-2011)
United Technologies Research Center (2009-2010)
MIT Lincoln Laboratories (2007-2009)

Selected Awards / Honors:

1. NSF CAREER Award (2018)
2. AFOSR YIP (“Career”) Award (2018)

3. Graduate Research Fellowship (2007 – 2011, Georgia Tech)
4. Outstanding Graduate Teaching Assistant (2007, Georgia Tech)
5. Presidents Undergraduate Research Award (2005, Georgia Tech)
6. Highest Honors (2003 – 2006, Georgia Tech)

Research Funding:

Below are on-going and past funding. Total current funding is **\$943,496.20**. Past funding includes **\$1,275,016.80** with total award of funding till date of **\$2,218,512.80**. Note: * Represents projects funded as a private entity and both PI/co-PI were founders, i.e., 50% shared in subsequent funding.

Current Funding:

1. **National Science Foundation CAREER Award** (FY: 2018 – 2023) **\$500,020.00**
Project: Network Geometry for Analyzing Dynamical Systems
Prime Role: sole-PI
2. **Air Force Office of Scientific Research YIP “Career”** (FY: 2018 – 2021) **\$443, 476.00**
Project: Interactive Feedback Control for 2D3D Autonomous Systems
Prime Role: sole-PI

Past Funding:

3. **Air Force Research Laboratory** (FY: 2014 – 2016) **\$749,747.20**
Project: Prototype and geometric modeled rad-hard chip sets (SBIR Phase II).
Prime Role: co-PI, PI: Kevin Brenner*
4. **Raytheon University Project** (FY: 2014 – 2015) **\$76,000.00**
Project: Performed exploratory modeling research on Raytheon EKV/SM3 platforms.
Subcontract Role: PI, co-PI: Kevin Brenner*, Prime: Georgia Tech (Pass-Through, Direct Award)
5. **National Science Foundation** (FY: 2013 – 2014) **\$150,000.00**
Project: Investigated geometric models for interconnect architectures (SBIR Phase I)
Prime Role: co-PI, PI: Kevin Brenner*
6. **Air Force Research Laboratory** (FY: 2013 – 2014) **\$149,696.34**
Project: Investigated geometric models of rad-hard chip sets (SBIR Phase I).
Prime Role: co-PI, PI: Kevin Brenner*
7. **Missile Defense Agency** (FY: 2013 – 2014) **\$149,573.26**
Project: Investigated simulated designs of AMPM missile platform (SBIR Phase I).
Prime Role: co-PI, PI: Kevin Brenner*

Teaching Experience:

1. **Georgia Tech ECE 3710** Fall 2006, Spring 2007
 Course Description: An introduction to electric circuit elements and electric devices and a study of circuits containing such devices.
2. **Georgia Tech ECE 4580 (Guest Lectures)** Fall 2009, Spring 2010
 Course Description: Computational and theoretical aspects of computer vision. Application area includes robotics, autonomous vehicles, and image-guided surgery.

3. **Georgia Tech ECE 6560 (Guest Lectures)** Spring 2010
 Course Description: Algorithms for computer vision and image processing, emphasizing partial-differential equation and active contour methods. Topics include image smoothing and enhancement, edge detection, morphology, and image reconstruction
4. **Stony Brook University: CS 377 (Guest Lectures)** Fall 2014
 Course Description: An introduction to the mathematical, physical, and computational principles underlying modern medical imaging systems.
5. **Stony Brook University: BMI 540** Fall 2017
 Course Description: This course introduces advance probability and statistical modeling methods in biomedical-informatics

Relevant Talks:

1. Missile Defense Agency, DV Group Spring 2017
 Title: "Geometry and Control Based Discrimination"
2. IEEE Control and Decision Conference Fall 2016
 Title: "Geometry of Correlation Networks"
3. Missile Defense Agency, QS Group Fall 2016
 Title: "Quantifying & Managing Supply Chain Risk"
4. Stony Brook University, Biomedical Informatics Dept. Spring 2016
 Title: "System Identification and Waterbed Effects of Dynamical Systems"
5. Johns Hopkins University, Electrical Engineering Dept. Spring 2016
 Title: "A Network Geometric Approach to Analyzing Complex Systems"
6. Missile Defense Agency, Redstone Arsenal Spring 2013
 Title: "Examining Anti-Corrosion and Pin-Hole Effects"
7. Aviation and Missile Research Development Center, Redstone Arsenal Fall 2012
 Title: "Next Generation Approaches for AMPM Architectures"
8. IEEE American Control Conference Summer 2011
 Title: "Robust Aim Point Estimation for 3DLADAR Imagery"
9. Carnegie Mellon University, Dept. of Mathematics Summer 2010
 Title: "Pose Estimation in Visual Tracking and Medical Imaging"
10. Israel Institute of Technology, Dept. of Electrical Engineering Fall 2009
 Title: "Dynamics in Point Set Registration"
11. IEEE Conference on Decision and Control Fall 2009
 Title: "Statistical Shape Learning for 3D Tracking"
12. IEEE Computer Vision and Pattern Recognition Summer 2009
 Title: "Non-Rigid 2D Image Segmentation and 2D3D Pose Estimation"
13. Decision and Control Symposium, Georgia Tech Spring 2008
 Title: "Particle Filtering for Registration of 2D/3D Point Sets with Stochastic Dynamics"
14. IEEE Computer Vision and Pattern Recognition Spring 2008
 Title: "Robust 3D Pose Estimation and Efficient 2D Region-Based Segmentation"
15. SPIE Medical Imaging Conference Fall 2007
 Title: "A New Distribution Metric for Image Segmentation"
16. SPIE Symposium on Electronic Imaging Summer 2007
 Title: "Tracking with a New Distribution Metric in a Particle Filtering Framework"

Thesis Committee

1. **Jeremy Lerner** (Department: Applied Mathematics and Statistics) Fall 2017
Title: “Rigid and Non-Rigid 2D-3D Pose Estimation Using the Bhattacharyya Coefficient and Locally Linear Embedding”
2. **Maryam Pouryahya** (Department: Applied Mathematics and Statistics) Spring 2018
Title: “Discrete Ricci Curvature for the Analysis of Networks”
3. **Mahsa Torkaman** (Department: Computer Science) Spring 2018
Title: “Mathematical Methods in Quantitative Medical Imaging”

Ph.D. Students (Mentorship)

1. **Arjun Krishna** (Department: Computer Science)
Research Area: Interactive Learning via Feedback Control
2. **Bipul Islam** (Department: Computer Science)
Research Area: Network Geometry of Multilayered Systems

Master Students (Mentorship)

1. **Onkar Deshpande** (Department: Applied Mathematics and Statistics)
2. **Jay Torasakar** (Department: Computer Science)
